DATE MAILED: 08/13/2002

Notice of Fee Increase on October 1, 2002

If a reply to a "Notice of Allowance and Fee(s) Due" is filed in the Office on or after October 1, 2002, then the amount due may be higher than that set forth in the "Notice of Allowance and Fee(s) Due" since there will be an increase in fees effective on October 1, 2002. See Revision of Patent and Trademark Fees for Fiscal Year 2003: Notice of Proposed Rulemaking, 67 Fed. Reg. 30634, 30636 (May 7, 2002). Although a change to the amount of the publication fee is not currently proposed for October 2002, if the issue fee or publication fee is to be paid on or after October 1, 2002, applicant should check the USPTO web site for the current fees before submitting the payment. The USPTO Internet address for the fee schedule is: <http://www.uspto.gov/main/howtofees.htm>.

If the issue fee paid is the amount shown on the "Notice of Allowance and Fee(s) Due," but not the correct amount in view of the fee increase, a "Notice to Pay Balance of Issue Fee" will be mailed to applicant. In order to avoid processing delays associated with mailing of a "Notice to Pay Balance of Issue Fee," if the response to the Notice of Allowance and Fee(s) due form is to be filed on or after October 1, 2002 (or mailed with a certificate of mailing on or after October 1, 2002), the issue fee paid should be the fee that is required at the time the fee is paid. If the issue fee was previously paid, and the response to the "Notice of Allowance and Fee(s) Due" includes a request to apply a previously-paid issue fee to the issue fee now due, then the difference between the issue fee amount at the time the response is filed and the previously paid issue fee should be paid. See Manual of Patent Examining Procedure, Section 1308.01 (Eighth Edition, August 2001).

Effective October 1, 2002, 37 CFR 1.18 is proposed to be revised to change the patent issue fees as set forth below. As stated above, the final fees may be a different amount, and applicant should check the web site given above when paying the fee.

(a) Issue fee for issuing each original or reissue patent, except a design or plant patent:

By a small entity (Sec. 1.27(a))--\$655.00

By other than a small entity--\$1,310.00

(b) Issue fee for issuing a design patent:

By a small entity (Sec. 1.27(a))--\$235.00

By other than a small entity--\$470.00

(c) Issue fee for issuing a plant patent:

By a small entity (Sec. 1.27(a))--\$315.00

By other than a small entity--\$630.00

Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Attorney Robert T. Pous (Reg. No. 29,099) on August 08, 2002.

The Examiner's amendment was done to change the dependency of claim 17 from claim 1 to claim 12, because the applicant in amendment letter received on July 24, 2002 has canceled claim 1 (see paper #9).

The application has been amended as follows:

C In claim 17, line 2, delete "1" and insert therein --12--.

Allowable Subject Matter

2. Claims 9-17 are allowed.
3. The following is an examiner's statement of reasons for allowance:

Claim 9 is allowed because the prior art of record, taken alone or in combination, fails to disclose or render obvious a particle-measuring method for measuring the number of particles included in an exhaust gas exhausted from a processing system for generating an atmosphere including atmospheric air or gas exhausted from within a processing chamber by a vacuum pump, and for processing an object relating to a semiconductor manufacturing in this atmosphere, the method comprising the steps of modeling a parameter regarding a principle of

Art Unit: 2877

generating particles, carrying out a numerical simulation for expressing trajectory of an exhaust gas, carrying out a trajectory numerical simulation of an exhaust gas and particles, and confirming an optimum position for measuring particles, in combination with the rest of the limitations of the claim.

Claims 10-11 are allowed because their limitations are dependent on limitations of independent claim 9.

4. Claim 12 is allowed because the prior art of record, taken alone or in combination, fails to disclose or render obvious a particle-measuring system comprising a laser beam irradiator installed on a sensor manifold, and having a driving mechanism movable in a radial direction, a beam stopper installed on the sensor manifold opposite to the laser beam irradiator, and a scattered light detector installed on the sensor manifold, in combination with the rest of the limitations of the claim.

5. Claims 13-14 are allowed because their limitations are dependent on limitations of independent claim 12.

6. Claim 15 is allowed because the prior art of record, taken alone or in combination, fails to disclose or render obvious a particle-measuring method for measuring the number of particles included in an exhaust gas exhausted from a processing system for generating an atmosphere including atmospheric air or gas exhausted from within a processing chamber by a vacuum exhaust system, and for processing an object relating to a semiconductor manufacturing in this atmosphere, the method comprising the steps of selecting an area in which the density of the particles is high by carrying out a simulation, and adjusting a position of a laser beam irradiator

C

Art Unit: 2877

so as to irradiate laser beam in an area in which the density of the particles is high based on the simulation, in combination with the rest of the limitations of the claim.

7. Claim 16 is allowed because the prior art of record, taken alone or in combination, fails to disclose or render obvious a particle-measuring method for measuring the number of particles included in an exhaust gas exhausted from a processing system for generating an atmosphere including atmospheric air or gas exhausted from within a processing chamber by a vacuum exhausting, the method comprising the steps of determining an optimum position of installing a sensor by simulation, and inputting the installation position information to a position controller of a laser position adjusting unit, in combination with the rest of the limitations of the claim.

8. Claim 17 is allowed because its limitations are dependent on limitations of independent claim 12.

9. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
